RADIAL SHOCK WAVE THERAPY

is a modern and effective non-invasive treatment for a number of common tendon problems including:

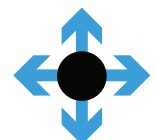

The BENEFITS of Shock wave Therapy

Shockwave is an acoustic wave which carries high energy to the painful tissue, e.g tendons. This energy promotes regeneration and reparation processes to the painful/injured tendon along with your own natural healing processes.

Short treatment time (minutes)

Treat Large areas

Non-invasive and no side effects

Results in a few (1-5) treatments

Alternative to medication

Muscle massage with vibrating applicator

M3 Clinic have the ONLY Shockwave machine in Northland
