The BENEFITS of Shock wave Therapy

Shockwave is an acoustic wave which carries high energy to the painful tissue, e.g tendons. This energy promotes regeneration and reparation processes to the painful/injured tendon along with your own natural healing processes.

Short treatment
time (minutes)

Treat
Large areas

Non-invasive and
no side effects

Results in a few
(1-5) treatments

Alternative to
medication

Muscle massage with
vibrating applicator

**Current research reports success rates between 65 and 91% in reducing patient's pain and symptoms after a course of 3-5 sessions.*

M3 Clinic have the ONLY
Shockwave machine in Northland
